Everything, handled with care

Net Zero Emissions Initiative

### Net Zero Emission Initiatives

Co2 Efficiency	Operational Solution	People Targets
<ul style="list-style-type: none"> <li>• Telematic-driven planning and mileage improvement goals</li> <li>• Accelerated vehicle replacement strategy</li> <li>• Accelerated transition to Biofuels</li> </ul>	<ul style="list-style-type: none"> <li>• Sea versus air freight solutions</li> <li>• Recycled Crating</li> <li>• Reusable Materials</li> <li>• Warehouse management, utilisation of solar power, motion-controlled lighting</li> <li>• Carbon offset option for clients</li> </ul>	<ul style="list-style-type: none"> <li>• Employee Go Green awareness and training</li> <li>• Electric &amp; Hybrid company cars only</li> <li>• Sponsorship of Environmental causes and charities</li> </ul>

### Net Zero Emission Objectives 3 Targets by 2025:

- Improvement in Co2 efficiency over our current base
- Improvement of operational solutions (including repurposing of materials and waste minimization)
- Develop “Net Zero” people targets, leverage the power and connections of our workforce

### Net Zero Carbon Design Strategies

- Reducing fossil energy demand
- Replacing/substituting fossil energy
- Reducing virgin materials demand
- Reducing need for material replacements during storage, moving & shipping life cycle
- Repurposing materials
- Restore climate balance to achieve net zero carbon
- Sequestering (biogenic) carbon

## Top Ten Considerations to Deliver Net Zero Carbon Emissions

1. Assess efficiency of fleet operation, including optimal loading, driving and projected transition to Alternative Fuel Vehicles
2. Examine route planning to reduce excess mileage, reduced vehicle wear and tear
3. Engage workforce to identify skills gaps or processes that need updating
4. Improve oversight and vehicle telematics
5. Investigate alternative fuels
6. Research replacement with carbon-neutral vehicles
7. Assess and improve infrastructure to support new vehicles
8. Explore marketing opportunities to guarantee clients are aware of environmentally friendly options
9. Implement trials to test vehicles and ensure that new vehicles are ideal replacements/upgrades
